

Financing solar thermal installations seminar

Absolicon has taken the initiative to gather a group of experts to discuss financing of large solar thermal installations in district heating and industry.

Solar electricity from photovoltaics has found good financing solutions and created a €100 billion market.

To reach a large market with solar heat, we need to find similar financial solutions for our new sector that potential is bigger than the electric sector. Two segments – district heating and industrial customers are identified. First step could be to create €10 in financed solar thermal installations.

Agenda 21st of February 2019:

- 10:00 – 10:15 Introduction Göran Carstedt, short presentations of all participants
10:15 – 10:30 Solar thermal to replace oil and gas – Joakim Byström
10:30 – 11:00 Three typical solar thermal cost and profit cases (Absolicon, Industrial Solar, SolAtom)
11:00 – 11:30 Presentation of participants experiences and observations
12:00 – 12:45 Lunch
12:45 – 13:15 The market for industrial solar heat, Bärbel Epp (video link) Solar payback
13:15 – 14:00 Discussions in smaller groups
14:00 – 14:15 WWFs climate, energy and innovation work Stefan Henningsson
14:30 – 15:00 Concluding discussion, Göran Carstedt
- 15:00 – 16:00 Free time for discussions
16:00 – 18:00 Absolicon board meeting
18:00 Joint dinner

Participants:

Absolicon Advisory board

Göran Carstedt
Tomas Kåberger
Andreas Stubelius
Stefan Henningsson, WWF

Absolicon board

Joakim Byström, Absolicon
Olle Olsson, Absolicon
Malte Frisk, Logosol
Peter Jonsson, Eurocon
Sören Olsson

Finance specialists

Stefan Jonsson, Glofin (leasing)
Fredrik Åker, LEAP (Baseload capital/Climeon)

Solar thermal companies

Tobias Schwind, Industrial Solar
Martin, Industrial Solar
Miguel Frasquet, Solatom
Carlo Semeraro, Absolicon

Venue:

Scandic Continental, Vasagatan 22
(opposite Stockholm Central / Airport Express)
